

MANUFACTURING COMPANY

TEJASA TC SILENTFLEX®

Top quality anti-vibration mounts

Our products

TEJASA TC / SILENTFLEX®

The wide range of Silentflex® all-metal vibration mounts offers a number of clear advantages over conventional vibration isolators:

100% metal vibration mounts Silentflex®

Capable of operating at
extreme temperatures
(-40°C to +300°C)

Resistant to fire,
corrosion, UV rays,
chemicals, oils, etc.

About 10 times
more durable than
rubber

Constant insulation
under variable loads

Traditional rubber vibration mounts

Must not operate
beyond the
temperature range
(-10 °C to + 70 °C)

Rubber degrades
quickly when
exposed to corrosive
environments

The service life of a
traditional vibration
mount is very limited

Do not provide
constant insulation
under variable loads

Vibration insulation

TEJASA TC / SILENTFLEX®

1. Lift / elevator equipment

2. Suspended ceilings

3. Floating slab

4. Pipes

5. Rubber buffers / stops

6. Boilers

7. Generator sets

8. Air conditioning

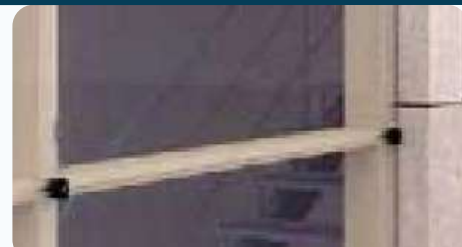

12. Stairs

9. Anti-seismic heaters

10. Walls

13. Electric panels

14. Transformers

11. Awning

15. Building foundation
